

AI GTM AGENCY

Complete Business Architecture

52 Agents · 8 Phases · End-to-End GTM Motion

Each agent definition includes:

- What it does — the business function in plain language
- Business rules — how it must behave and what guardrails it must respect
- Business output — the specific deliverable it produces
- Success definition — how you know it is working

Contents

PHASE 1 — FIND (5 agents)

ICP Definition Agent · Lead Generation Agent · ICP Scoring Agent · Buying Signal Detection Agent · Lookalike Finder Agent

PHASE 2 — UNDERSTAND (5 agents)

Account Intelligence Agent · Stakeholder Mapping Agent · Competitive Intelligence Agent · Market Sizing Agent · GTM Insight Generator

PHASE 3 — REACH (5 agents)

Personalisation Agent · Outreach Copywriter Agent · Channel Strategy Agent · Omnichannel Outreach Orchestrator · A/B Testing Agent

PHASE 4 — ENGAGE (6 agents)

Inbox Management Agent · Reply Handling Agent · Objection Handling Agent · Follow-up Sequencing Agent · Social Listening Agent · Voice Call Agent

PHASE 5 — CONVERT (10 agents)

Meeting Booking Agent · Pre-Meeting Brief Agent · Deal Qualification Agent · Proposal Generation Agent · Proposal Follow-up Agent · Executive Engagement Agent · Contract & Closing Agent · RFP Response Agent · Procurement Navigation Agent · POC Management Agent

PHASE 6 — MANAGE & REPORT (7 agents)

CRM Sync Agent · Pipeline Management Agent · Revenue Forecasting Agent · Board Reporting Agent · ROI Attribution Agent · Data Refresh Agent · Inbound Signal Capture Agent

PHASE 7 — RETAIN & GROW (7 agents)

Onboarding Handoff Agent · Lead Nurturing Agent · Re-engagement Agent · Champion Tracker Agent · Expansion & Upsell Agent · Referral Agent · Revenue Intelligence Agent

ENTERPRISE LAYER — ENTERPRISE CONTROL (7 agents)

GTM Orchestrator · Multi-Tenant Management Agent · White-Label Delivery Agent · Compliance & Governance Agent · SLA Monitoring Agent · Inbound Content Agent · ABM Orchestration Agent

PHASE 1 · FIND

Identify your ideal customer and build a qualified list of them at scale

AGENT 01 ICP Definition Agent

Defines exactly who your ideal customer is before any outreach begins

WHAT IT DOES

Builds a detailed profile of your best-fit customer — industry, company size, geography, business stage, revenue range, pain points, and who the buyer is within that company.

BUSINESS RULES

- Must be defined before any other agent starts work
- ICP must include both company-level and person-level criteria
- Must specify who is the buyer, who is the user, and who is the blocker
- ICP must be reviewed and updated every 30 days based on win/loss data
- If no ICP exists, the system should not allow outreach to begin
- Multiple ICPs allowed — one per product line or market segment

BUSINESS OUTPUT

A precise, documented customer profile that every other agent in the system uses as its north star

SUCCESS LOOKS LIKE

Every lead in the pipeline matches at least 70% of ICP criteria. Zero outreach sent to companies outside the defined profile.

AGENT 02 Lead Generation Agent

Finds companies and people that match your ICP at scale

WHAT IT DOES

Scours multiple sources to build a raw list of target companies and contacts that match your ideal customer profile. Runs continuously, not just once.

BUSINESS RULES

- Must pull from at least 3 different sources to avoid list overlap
- Only captures contacts who are relevant to the buying decision
- Must capture both company-level and contact-level information
- Deduplication must run before any lead enters the pipeline
- List must be timestamped — leads older than 90 days need re-verification
- Must not include companies already in the CRM as active customers
- Volume targets must be set per market segment

BUSINESS OUTPUT

A large, fresh, deduplicated list of target companies and contacts ready for scoring

SUCCESS LOOKS LIKE

A minimum of X new qualified leads added to the pipeline per week, with less than 5% bounce rate on contact details.

AGENT 03 ICP Scoring Agent*Ranks every lead so the best opportunities are worked first***WHAT IT DOES**

Takes the raw lead list and scores each lead against the ICP definition. Considers firmographic fit, role seniority, presence of buying signals, and engagement history.

BUSINESS RULES

- Every lead must receive a score before entering any outreach sequence
- Scoring must be based on weighted criteria — not all ICP factors are equal
- Hot leads (80%+ match) go to immediate outreach queue
- Warm leads (50-79% match) go to nurture queue
- Cold leads (below 50%) are archived, not deleted
- Score must be recalculated whenever new information is available
- Scoring logic must be transparent and explainable — not a black box

BUSINESS OUTPUT

A prioritised lead queue — Hot, Warm, Cold — with score reasoning attached to each lead

SUCCESS LOOKS LIKE

Hot leads convert to meetings at 3x the rate of unscored leads. No time wasted on leads that don't fit.

AGENT 04 Buying Signal Detection Agent*Identifies which leads are in an active buying moment right now***WHAT IT DOES**

Monitors for trigger events that indicate a company is ready to buy — recent funding, aggressive hiring, leadership change, expansion announcement, or competitor dissatisfaction.

BUSINESS RULES

- Signals must be verified before elevating a lead's priority
- Each signal type must carry a defined weight in the overall score
- Funding signals: alert within 48 hours of announcement
- Hiring signals: 3+ relevant role postings in 30 days counts as a signal
- Leadership change signal: new C-suite in role less than 6 months
- Competitor complaint signal: public post expressing dissatisfaction

BUSINESS OUTPUT

A real-time hot list of leads with active buying signals, ranked by signal strength and urgency

SUCCESS LOOKS LIKE

Outreach triggered within 24 hours of a signal event. Signal-triggered leads convert at 2x the rate of cold leads.

- Stale signals (older than 60 days) must be deprioritised automatically

AGENT 05 Lookalike Finder Agent*Clones your best customers to find more just like them***WHAT IT DOES**

Analyses the characteristics of your top 10 existing customers, identifies the patterns that make them high-value, and discovers new companies that share those exact characteristics.

BUSINESS RULES

- Must use only closed-won deals as the basis — not trials or churned accounts
- Minimum of 5 reference customers required before lookalike generation
- Lookalike score must be displayed alongside each suggested company
- Must flag if a suggested lookalike is already in the pipeline
- Refresh lookalike pool every 30 days as more wins accumulate
- Must exclude direct competitors of existing customers

BUSINESS OUTPUT

A continuously growing list of high-probability new leads modelled on your proven best customers

SUCCESS LOOKS LIKE

Lookalike leads convert to meetings at a higher rate than standard ICP-matched leads.

PHASE 2 · UNDERSTAND

Go deep on every target account before saying a single word

AGENT 06 Account Intelligence Agent

Builds a complete picture of every target company

WHAT IT DOES

Researches what the company does, their current business challenges, recent strategic moves, growth trajectory, competitive position, and where they are most likely feeling pain right now.

BUSINESS RULES

- Research must be completed before personalisation begins
- Must include both public information and inferred insights
- Company brief must be updated if outreach hasn't started within 30 days
- Must flag if the company is going through any instability — layoffs, legal issues, restructuring
- Insights must be translated into relevance for the product being sold
- Must distinguish between confirmed facts and inferences

BUSINESS OUTPUT

A detailed, ready-to-use company brief that informs all personalisation and outreach strategy

SUCCESS LOOKS LIKE

Every outreach message references at least one specific, accurate, and relevant company insight.

AGENT 07 Stakeholder Mapping Agent

Identifies every person involved in the buying decision at a target company

WHAT IT DOES

Maps the full buying committee — who holds the budget, who champions the solution, who influences the decision, and who has the power to block the deal. Recommends the best entry point.

BUSINESS RULES

- Must identify at minimum: Economic Buyer, Champion, and one Influencer
- Must flag if the identified Champion does not have budget authority
- Entry point recommendation must be based on accessibility, not just seniority
- Must track relationship between stakeholders — who reports to whom
- If a contact has changed roles in the last 3 months, flag as lower confidence
- Multi-threading must begin once a deal

BUSINESS OUTPUT

A ranked contact map per account showing each person's role in the buying process and the recommended outreach approach for each

SUCCESS LOOKS LIKE

Deals where 3+ stakeholders are engaged close at 2x the rate of single-threaded deals.

- reaches qualified stage
- Must never contact the Blocker before the Champion is engaged

AGENT 08 Competitive Intelligence Agent

Understands the competitive landscape so you can position to win

WHAT IT DOES

Tracks what competitors offer, how they position, what their customers complain about, where they are weak, and what messages are winning in the market.

BUSINESS RULES

- Competitive data must be refreshed at least monthly
- Must track at minimum 3 direct competitors at all times
- Customer complaints must be categorised — price, support, features, reliability
- Competitive positioning must be translated into specific talk tracks
- Must flag when a target lead is already using a competitor
- Win/loss patterns against each competitor must be tracked and surfaced
- Must never disparage competitors — only highlight your differentiation

BUSINESS OUTPUT

A live competitive positioning guide — where you win, where you're at risk, and exactly what to say in each scenario

SUCCESS LOOKS LIKE

Win rate against each competitor tracked and improving quarter over quarter.

AGENT 09 Market Sizing Agent

Determines which markets are worth pursuing and how big the opportunity is

WHAT IT DOES

Calculates the total addressable opportunity in each segment, identifies which verticals have the most qualified leads, and recommends where to focus GTM effort for fastest return.

BUSINESS RULES

- Market size must be calculated from bottom-up lead data, not just industry reports
- Must separate TAM (total), SAM (serviceable), and SOM (realistic near-term)
- Market prioritisation must factor in competition density, not just size
- Must be recalculated every quarter as market conditions change

BUSINESS OUTPUT

A ranked market map showing opportunity size, competition level, and recommended priority order for GTM investment

SUCCESS LOOKS LIKE

GTM resources concentrated in segments generating 80% of pipeline.

- Must flag markets where less than 100 qualified leads exist — too small to prioritise
- Seasonal buying patterns must be factored into timing recommendations

AGENT 10 GTM Insight Generator

Turns all intelligence into a clear strategic GTM direction

WHAT IT DOES

Synthesises everything learned about markets, leads, competitors, and buying signals into actionable recommendations — which segment to target, which angle to lead with, what message will land.

BUSINESS RULES

- Must run after all intelligence agents have completed their analysis
- Recommendations must be specific and actionable — not generic
- Must include a recommended message angle for each target segment
- Must flag contradictions between intelligence sources
- Output must be written in plain business language — no jargon
- Must be reviewed by a human before becoming the active GTM strategy
- Must be updated whenever market conditions or win/loss data changes significantly

BUSINESS OUTPUT

A clear GTM strategy brief — who to target this month, what message to lead with, which channel to use, and why

SUCCESS LOOKS LIKE

GTM strategy is aligned across all agents. No agent is sending a message that contradicts the overall strategy.

PHASE 3 · REACH

Craft the right message and deliver it on the right channel at the right time

AGENT 11 Personalisation Agent

Makes every single outreach message feel like it was written just for that person

WHAT IT DOES

Uses everything known about the lead — their recent activity, company news, role, pain points, and trigger events — to craft a unique, relevant opening that is impossible to ignore.

BUSINESS RULES

- Every message must contain at least one specific, verifiable personalised insight
- Must never fabricate information — only use confirmed data
- Personalisation must be relevant to the product being sold, not just flattery
- If sufficient personalisation data is unavailable, the message must be held until data is gathered
- Must not reference personal information that could feel invasive or creepy
- Personalisation quality must be scored before message is approved for sending
- Must vary personalisation angle — not every message references the same trigger

BUSINESS OUTPUT

A unique, relevant, high-quality personalised opening for every single contact — no two messages identical

SUCCESS LOOKS LIKE

Reply rate on personalised messages is at least 3x higher than generic messages sent to same segment.

AGENT 12 Outreach Copywriter Agent

Writes the complete outreach sequence for every channel

WHAT IT DOES

Creates the full messaging sequence — first message, follow-ups, and a respectful breakup message — across email, LinkedIn, phone, and WhatsApp. Each message adds value, not just follow-up noise.

BUSINESS RULES

- First message must lead with value or insight — never a product pitch
- Each follow-up must add new information or a new angle — never just a bump
- Maximum 5 touches in a sequence before a 30-day pause
- Breakup message must

BUSINESS OUTPUT

A complete, channel-specific, persona-specific multi-touch sequence ready for deployment

SUCCESS LOOKS LIKE

Average reply rate across all sequences above 8%. Open rates above 45%.

- be respectful and leave the door open
- Call-to-action must be a single, specific, low-friction ask
- Messages must be written for the specific persona — different tone for CEO vs HR Manager
- Subject lines must be tested in pairs — never launch with a single untested subject line
- Must never use misleading subject lines or deceptive tactics

AGENT 13 Channel Strategy Agent

Decides which channel to use for which person and in what sequence

WHAT IT DOES

Determines whether to lead with email or LinkedIn or a phone call based on the persona, industry, and what the data shows about what works for that segment. Decides timing and frequency.

BUSINESS RULES

- Channel selection must be based on where the persona is most active and reachable
- LinkedIn must be the primary channel for senior roles at companies under 200 people
- Email must be primary for companies with corporate email domains and formal buying processes
- Phone must only be used after at least one digital touchpoint with no response
- Must respect channel frequency limits — no more than 2 touches per week per channel
- Channel strategy must be adjusted based on engagement data within 2 weeks of launch
- Must never contact the same person on 3 channels simultaneously in the same day

BUSINESS OUTPUT

A per-lead channel plan specifying which channel to use, in what order, at what frequency, and at what time of day

SUCCESS LOOKS LIKE

Channel strategy continuously optimised. Highest-performing channel for each segment clearly identified within 60 days.

AGENT 14 Omnichannel Outreach Orchestrator

Executes all outreach across all channels seamlessly and in sync

WHAT IT DOES

Manages the actual sending of all messages across email, LinkedIn, phone, and WhatsApp according to the channel strategy. Manages timing, volume, channel switching, and ensures nothing is sent twice.

BUSINESS RULES

- Must check for existing active conversations before starting a new sequence
- Must pause all outreach to an account the moment a reply is received
- Must enforce daily sending limits to protect domain reputation
- Must respect timezone — no messages sent before 8am or after 6pm local time of recipient
- Must detect out-of-office replies and reschedule accordingly
- A/B test variants must be evenly split and results tracked separately
- Must never send a follow-up if the previous message was opened in the last 24 hours
- Must stop all outreach if a contact unsubscribes or marks as spam

BUSINESS OUTPUT

All outreach delivered, tracked, and logged across every channel with full audit trail

SUCCESS LOOKS LIKE

Zero duplicate messages sent. Zero messages sent to opted-out contacts. Sending reputation score maintained above 90.

AGENT 15 A/B Testing Agent

Continuously tests what messages and approaches work best

WHAT IT DOES

Tests different subject lines, opening lines, CTAs, and sequence structures across different segments to identify what drives the highest reply rates. Automatically retires losing variants.

BUSINESS RULES

- Minimum sample size of 50 sends per variant before declaring a winner
- Only one variable can be tested at a time per experiment
- Losing variants must be retired after a statistically significant result
- Test results must be documented and accessible to inform future copy
- Must test across segments separately — a winner for one segment may lose in another
- Testing cadence: at least one new test running per segment at all times
- Human must approve

BUSINESS OUTPUT

A continuously improving library of winning message variants per segment, with documented performance data

SUCCESS LOOKS LIKE

Average reply rate improves by at least 20% in the 90 days following systematic A/B testing.

	new test variants before they go live	
--	--	--

PHASE 4 · ENGAGE

Manage every conversation and never let a lead go cold

AGENT 16 Inbox Management Agent

Monitors and classifies every reply across every channel instantly

WHAT IT DOES

Reads all incoming replies and classifies them — Interested, Not Now, Wrong Person, Has a Question, Not Interested — then routes each to the correct next action without delay.

BUSINESS RULES

- All replies must be classified within 15 minutes of receipt
- Interested replies must trigger a meeting booking attempt within 1 hour
- Wrong Person replies must trigger a request for the right contact's details
- Not Interested replies must trigger immediate sequence pause and CRM update
- If classification confidence is below 80%, route to human review
- Must monitor email, LinkedIn, WhatsApp, and any other active channels
- Must never send an automated reply to a reply that already received one

BUSINESS OUTPUT

Every reply classified and routed to the correct action within minutes — no lead ever sits unanswered

SUCCESS LOOKS LIKE

100% of replies actioned within 1 business hour. Zero replies left unclassified.

AGENT 17 Reply Handling Agent

Responds to every reply with the right message at the right speed

WHAT IT DOES

Drafts or sends the appropriate response based on the reply classification — books meeting if interested, answers questions if asked, handles objections if raised, removes if requested.

BUSINESS RULES

- Responses to interested leads must be sent within 30 minutes during business hours
- All automated responses must be reviewed before sending for high-value accounts
- Must maintain full context of the conversation thread in every response
- Must never send a canned response that doesn't directly address what was said
- Questions must be

BUSINESS OUTPUT

Every reply receives a contextually accurate, timely, and appropriate response that moves the conversation forward

SUCCESS LOOKS LIKE

Positive replies that receive a response within 30 minutes convert to meetings at 2x the rate of slower responses.

- answered accurately — never deflect or give a non-answer
- If a question requires product knowledge beyond the agent's scope, escalate to human
- All responses must be logged in the CRM with timestamp

AGENT 18 **Objection Handling Agent**

Turns every objection into a conversation that can still move forward

WHAT IT DOES

Identifies the type of objection — price, timing, already have a solution, not a priority — and crafts a personalised response that addresses the specific concern without being pushy or dismissive.

BUSINESS RULES

- Must identify objection type before crafting a response
- Price objection: never discount immediately — first establish value
- Timing objection: must acknowledge and set a specific future follow-up date
- Competitor objection: must respond with differentiation, never competitor bashing
- Not a priority objection: must try to understand what their current priorities are
- After handling an objection twice with no movement, move to nurture — do not persist
- All objection handling must be logged to improve future playbooks

BUSINESS OUTPUT

Personalised, empathetic responses to every objection that give the deal the best chance of continuing

SUCCESS LOOKS LIKE

Objection-to-meeting conversion rate tracked and improving. At least 20% of objections converted to continued conversations.

AGENT 19 **Follow-up Sequencing Agent**

Manages the complete follow-up cadence so no lead is ever forgotten

WHAT IT DOES

Tracks every lead's last touchpoint, decides when the next follow-up should happen, adjusts messaging based on engagement signals, and knows when to pause, restart, or end a sequence.

BUSINESS RULES

- Every lead in the pipeline must always have a next action scheduled
- Follow-up intervals: Day 1, Day 4, Day 8, Day 15, Day 25 — then 30-day pause

BUSINESS OUTPUT

A fully automated, intelligently timed follow-up system where every lead always has a next scheduled touchpoint

SUCCESS LOOKS LIKE

	– If a lead opens a message but doesn't reply, follow up within 48 hours – Sequence must be paused if any kind of engagement is detected – Must not follow up more than 5 times in a single sequence without a break – After a 30-day pause, re-engage with a completely fresh angle – Must track and report which follow-up number generates the most replies	Zero leads fall through the cracks. Pipeline coverage always matches total number of active leads.
--	--	--

AGENT 20 Social Listening Agent

Catches leads who are publicly signalling they need what you offer

WHAT IT DOES

Monitors LinkedIn, communities, forums, and industry groups for people expressing pain points, asking for vendor recommendations, or complaining about problems your product solves.

BUSINESS RULES

- Must monitor at least 5 relevant keywords or pain point phrases
- Signals must be verified as relevant before being added to the lead pipeline
- Response to public signals must happen within 24 hours while context is fresh
- Must not copy public posts or quote them without permission
- Engagement must feel organic — not robotic or sales-y
- Must track which listening channels generate the highest quality leads
- Must exclude competitor employees and irrelevant industries from results

BUSINESS OUTPUT

A real-time feed of high-intent prospects who are publicly signalling a need, added directly to the hot lead queue

SUCCESS LOOKS LIKE

Social listening contributes at least 10% of total pipeline within 60 days of activation.

AGENT 21 Voice Call Agent

Conducts AI-powered outbound calls as part of the outreach sequence

WHAT IT DOES

Places outbound calls to

BUSINESS RULES

- Calls must only be placed

BUSINESS OUTPUT

Calls placed, outcomes

prospects, delivers a personalised and relevant opening, handles basic questions and soft objections, and books a follow-up meeting or hands off to a human when needed.

- between 9am and 5pm in the recipient's local timezone
- Call must be clearly identified as an AI-assisted call if asked
- Must have a personalised opening ready before the call is placed
- If the contact asks to not be called again, immediately add to do-not-call list
- Must not leave more than 2 voicemails in a single sequence
- Call outcomes must be logged within 5 minutes of call completion
- If a meeting is booked on the call, a confirmation must be sent within 10 minutes

logged, meetings booked or next step scheduled — the phone channel fully covered

SUCCESS LOOKS LIKE

Call-to-meeting conversion rate tracked. Voice channel contributes measurably to overall pipeline.

PHASE 5 · CONVERT

Turn interested prospects into signed, paying customers

AGENT 22 Meeting Booking Agent

Books the meeting the moment a prospect expresses interest

WHAT IT DOES

Handles all scheduling logistics — sends availability, coordinates timezones, confirms the meeting, sends a pre-meeting agenda, reminder 24 hours before, and reschedules no-shows.

BUSINESS RULES

- Meeting link must be sent within 15 minutes of an interested reply
- Must offer at least 3 time slot options in the prospect's timezone
- Confirmation email must include a clear agenda and what the prospect should expect
- Reminder must be sent 24 hours before and 1 hour before the meeting
- If prospect no-shows, rescheduling attempt must happen within 2 hours
- Maximum 2 rescheduling attempts before moving to nurture
- All meeting details must be auto-logged in the CRM

BUSINESS OUTPUT

Meetings confirmed, agendas sent, reminders delivered — the prospect shows up prepared and on time

SUCCESS LOOKS LIKE

Meeting show rate above 80%. No-show recovery rate above 50%.

AGENT 23 Pre-Meeting Brief Agent

Prepares a complete business brief before every sales conversation

WHAT IT DOES

Generates a one-page summary of the prospect — company background, recent news, likely pain points, what they care about, expected objections, and specific talking points for this meeting.

BUSINESS RULES

- Brief must be delivered at least 30 minutes before the meeting starts
- Must be specific to this prospect — no generic templates
- Must include at least one recent, specific company development
- Must include predicted objections and suggested responses
- Must be under one page — concise and scannable, not exhaustive

BUSINESS OUTPUT

A one-page, meeting-ready brief delivered to the seller before every call — no one walks in unprepared

SUCCESS LOOKS LIKE

Sellers who use the brief report higher confidence. Meeting-to-opportunity conversion improves.

- Must flag if any unusual context exists — leadership change, funding news, competitor situation
- Brief must be archived in the CRM and linked to the deal record

AGENT 24 Deal Qualification Agent

Assesses whether a deal is worth pursuing and at what priority

WHAT IT DOES

After a discovery call, evaluates the deal against key criteria — does the prospect have the budget, authority, genuine need, and realistic timeline to buy? Recommends pursue, nurture, or disqualify.

BUSINESS RULES

- Every deal must be qualified within 24 hours of a discovery meeting
- Must assess: Budget confirmed, Decision maker engaged, Problem clearly defined, Timeline stated
- Unqualified deals must never receive a proposal
- If timeline is more than 12 months out, move to nurture — do not invest sales effort
- Qualification score must be visible to the sales team at all times
- Disqualified deals must have a reason logged — this data improves ICP over time
- Re-qualification must happen if deal goes inactive for more than 30 days

BUSINESS OUTPUT

A clear qualification verdict per deal — pursue, nurture, or disqualify — with reasoning attached

SUCCESS LOOKS LIKE

Deals that enter proposal stage have a close rate above 40%. Unqualified deals identified before proposal stage.

AGENT 25 Proposal Generation Agent

Creates a customised, compelling proposal for every qualified deal

WHAT IT DOES

Uses everything known about the prospect — their pain points, business goals, company context, and conversation notes — to generate a tailored proposal that mirrors their exact situation.

BUSINESS RULES

- Proposals must only be generated for deals that have passed qualification
- Every proposal must reference the prospect's specific stated pain points
- Proposals must lead with

BUSINESS OUTPUT

A personalised, professionally formatted proposal ready to send within hours of a discovery meeting

SUCCESS LOOKS LIKE

Proposal-to-close rate above 40%. Prospects who receive personalised proposals close

	business outcomes — not product features – Pricing must be presented in a way that is anchored to value delivered – Proposal must include relevant case studies from similar companies – Must be reviewed by a human before sending for deals above a defined value threshold – Proposal must have a clear expiry date — creates urgency and prevents indefinite delays	faster than those receiving generic ones.
--	---	--

AGENT 26 Proposal Follow-up Agent

Tracks proposal engagement and follows up at exactly the right moment

WHAT IT DOES

Monitors whether the proposal has been opened, when, how many times, and by how many people. Triggers the appropriate follow-up based on actual engagement signals.

BUSINESS RULES

- If proposal not opened within 48 hours, send a check-in
- If proposal opened multiple times, follow up within 24 hours — high intent signal
- If proposal opened and shared with others, alert the seller immediately
- Maximum 3 proposal follow-ups before moving to a different approach
- Follow-ups must reference specific sections of the proposal, not just ask for a decision
- Must never pressure or create false urgency in follow-ups
- Proposal engagement data must be logged in the CRM

BUSINESS OUTPUT

Proposals are followed up at the moment of highest intent — increasing close rates without being pushy

SUCCESS LOOKS LIKE

Proposals followed up on open signals close 40% faster than those with generic follow-up timing.

AGENT 27 Executive Engagement Agent

Engages senior decision makers with board-level business conversations

WHAT IT DOES

Creates executive-level

BUSINESS RULES

- Executive

BUSINESS OUTPUT

An executive-ready

business cases, ROI models, and strategic briefings that speak in terms of business outcomes — revenue growth, cost reduction, risk mitigation — never product features.

- communications must be brief — no more than one page
- Must lead with business outcomes and financial impact, not product details
- ROI model must use the prospect's own industry benchmarks where possible
- Must never be sent before a Champion has been engaged and briefed
- Executive engagement must be coordinated with Champion — no surprises
- Must offer a peer reference or case study relevant to their industry
- Follow-up to executive must happen at most once per week — respect their time

business case and ROI model that speaks to leadership priorities and accelerates sign-off

SUCCESS LOOKS LIKE

Deals with C-suite engagement close 2x faster than single-threaded deals.

AGENT 28 Contract & Closing Agent

Manages the full contract process from draft to signed

WHAT IT DOES

Generates the contract, tracks its status, manages the negotiation process, follows up with procurement, and ensures nothing stalls at the finish line after a verbal yes.

BUSINESS RULES

- Contract must be sent within 24 hours of a verbal agreement
- All commercial terms must match what was presented in the proposal
- Must track contract open/sign status and follow up if not signed within 5 days
- Legal redlines must be escalated to a human — not handled autonomously
- Must maintain a log of all negotiated changes for future benchmarking
- Procurement follow-up must happen every 3 business days until signed
- Signed contract must trigger immediate CRM deal close and handoff

BUSINESS OUTPUT

Contract sent, tracked, negotiated, and signed — deal officially closed with full paper trail

SUCCESS LOOKS LIKE

Average time from verbal agreement to signed contract under 10 business days.

initiation

AGENT 29 RFP Response Agent*Responds to enterprise RFPs and RFIs comprehensively and on time***WHAT IT DOES**

Reads the full RFP document, extracts every requirement, and drafts a structured response that addresses each point with relevant capabilities, case studies, compliance documentation, and commercial terms.

BUSINESS RULES

- Must read and map every RFP requirement before drafting begins
- Must not skip or gloss over any requirement — even difficult ones
- Every claim of capability must be backed by evidence or a case study
- Compliance sections must be answered with documented, verifiable statements
- Pricing section must be reviewed by a human before submission
- Must submit at least 24 hours before the deadline — never last minute
- All RFP responses must be archived to improve future responses

BUSINESS OUTPUT

A complete, on-time, compelling RFP response that positions the company as the clear frontrunner

SUCCESS LOOKS LIKE

RFP-to-shortlist rate above 50%. Every submitted RFP is complete and on time.

AGENT 30 Procurement Navigation Agent*Guides deals through enterprise procurement without stalling***WHAT IT DOES**

Maps the procurement process for each target enterprise, manages vendor registration, tracks required documentation, and maintains consistent follow-up with procurement contacts until the deal is cleared.

BUSINESS RULES

- Procurement process must be mapped at the start of every enterprise deal
- All required vendor documentation must be prepared proactively — not reactively
- Must follow up with procurement every 3 business days
- Must escalate if procurement has been silent for more than 7 business days
- Must track all procurement contacts separately from

BUSINESS OUTPUT

Deal clears procurement without unnecessary delays. No surprises in the final stages.

SUCCESS LOOKS LIKE

Average procurement cycle time tracked and reducing over successive enterprise deals.

- commercial contacts
- SLA or contract value thresholds that trigger extended procurement review must be flagged early
- Must never bypass procurement — work with it, not around it

AGENT 31 POC Management Agent

Manages pilots and proof-of-concept projects to maximise conversion to full deal

WHAT IT DOES

Defines pilot scope and measurable success criteria upfront, tracks progress throughout, conducts regular check-ins, measures results against agreed criteria, and packages the outcome into a compelling full-rollout business case.

BUSINESS RULES

- Success criteria must be agreed and documented before pilot begins
- Pilot scope must be tightly defined — not open-ended
- Check-ins must happen at minimum every 2 weeks during the pilot
- Any issues during the pilot must be escalated and resolved within 48 hours
- Results must be measured against the original agreed criteria — no post-hoc reframing
- POC must have a defined end date — no indefinite pilots
- Results report must be delivered to the prospect within 5 days of pilot completion

BUSINESS OUTPUT

A documented POC result with business impact evidence, packaged as a compelling case for full deployment

SUCCESS LOOKS LIKE

POC-to-full-contract conversion rate above 70%.

PHASE 6 · **MANAGE & REPORT**

Keep the pipeline clean, visible, and always moving forward

AGENT 32 CRM Sync Agent

Keeps the CRM perfectly accurate with zero manual data entry

WHAT IT DOES

Automatically logs every touchpoint — every message sent, reply received, meeting held, and deal stage change — into the CRM in real time. Ensures the data is always complete and trustworthy.

BUSINESS RULES

- Every outreach touchpoint must be logged within 1 hour of occurring
- Every reply must be logged with its classification attached
- Meeting notes must be attached to the deal record within 24 hours
- Deal stage must update automatically based on defined milestone triggers
- Duplicate records must be flagged and merged — no ghost contacts
- Contact details must be verified before being entered into the CRM
- Data must never be deleted — only archived with a reason

BUSINESS OUTPUT

A perfectly maintained CRM that reflects every interaction with complete accuracy — the single source of truth

SUCCESS LOOKS LIKE

CRM data completeness above 95%. Zero deals with no activity logged in the last 14 days.

AGENT 33 Pipeline Management Agent

Provides real-time visibility into every deal and flags what needs attention

WHAT IT DOES

Monitors all active deals, identifies which are at risk of going cold, surfaces opportunities that are ready to advance, and recommends the single most important next action for each deal.

BUSINESS RULES

- Any deal with no activity for 7 days must be flagged as at-risk
- Pipeline stage definitions must be standardised and consistently applied
- Deals stuck in the same stage for more than 21 days must trigger an alert
- Next best action must be specific — never just say 'follow up'
- Pipeline review report must be generated every Monday morning automatically

BUSINESS OUTPUT

A live, accurate pipeline health view with deal risk alerts and specific next actions for every active opportunity

SUCCESS LOOKS LIKE

Pipeline coverage ratio maintained above 3x. Deal velocity improving quarter over quarter.

- Deals with no next action scheduled must be escalated immediately
- Closed-lost deals must have a loss reason logged before being removed from the pipeline

AGENT 34 Revenue Forecasting Agent

Predicts what revenue will close and when with confidence

WHAT IT DOES

Uses deal stage, engagement level, velocity, qualification score, and historical conversion patterns to generate monthly and quarterly revenue forecasts with confidence levels per deal.

BUSINESS RULES

- Forecast must be updated every Monday with latest pipeline data
- Must provide three scenarios: conservative, base, and optimistic
- Confidence levels must be calculated from actual historical data — not gut feel
- Deals with less than 30% confidence must be excluded from committed forecast
- Forecast must flag when quarter-end target is at risk with enough time to act
- Must track forecast accuracy over time — if consistently wrong, recalibrate
- Sales leadership must review and approve the forecast every two weeks

BUSINESS OUTPUT

A rolling monthly and quarterly revenue forecast with confidence levels and clear variance explanation

SUCCESS LOOKS LIKE

Forecast accuracy within 15% of actual. Leadership has confidence in the number.

AGENT 35 Board Reporting Agent

Generates leadership and board-ready GTM performance reports automatically

WHAT IT DOES

Compiles pipeline data, conversion metrics, channel performance, revenue against target, and GTM efficiency into clean, visually clear reports for leadership reviews and board meetings.

BUSINESS RULES

- Reports must be ready before the meeting they are needed for — never generated day-of
- Must include: pipeline by stage, conversion rates, revenue vs target, and top risks

BUSINESS OUTPUT

Publication-ready GTM performance reports delivered automatically on the correct cadence

SUCCESS LOOKS LIKE

Leadership enters every board meeting with accurate, up-to-date GTM data. Zero manual report preparation

	– Data must be sourced from the CRM — no manual data entry in reports – Must include period-over-period comparison — not just current snapshot – Must highlight 3 things going well and 3 things that need attention – Must be generated in a format that requires no editing before presenting – Distribution list must be pre-defined and reports auto-sent at the right cadence	time.
--	--	-------

AGENT 36 ROI Attribution Agent

Shows exactly which activities are generating pipeline and revenue

WHAT IT DOES

Tracks every touchpoint in the buyer journey and attributes pipeline and revenue to the specific messages, channels, sequences, and agent actions that influenced each deal.

BUSINESS RULES

- Must use multi-touch attribution — not just first or last touch
- Attribution data must be reviewed monthly and used to inform resource allocation
- Must track cost per lead, cost per meeting, and cost per closed deal by channel
- If a channel is consistently showing negative ROI, it must be flagged for review
- Attribution model must be consistent and agreed upon before measurement begins
- Must distinguish between influenced pipeline and sourced pipeline
- Attribution data must feed back into the A/B testing and channel strategy agents

BUSINESS OUTPUT

A full attribution report showing which activities drive revenue — enabling confident investment decisions

SUCCESS LOOKS LIKE

GTM spend continuously shifting toward highest-ROI channels. Cost per acquisition reducing quarter over quarter.

AGENT 37 Data Refresh Agent

Keeps the entire lead database accurate and up to date continuously

WHAT IT DOES

Continuously re-verifies contact information, updates records when people change jobs, removes contacts who have left companies, and enriches records with newly available information.

BUSINESS RULES

- All contact records must be re-verified at least every 90 days
- Bounced emails must trigger immediate contact re-verification
- Job change detected: flag as high-priority and route to re-engagement
- Contacts at companies that have shut down or been acquired must be archived
- Data refresh must run in the background — never interrupting active sequences
- Must maintain a data quality score per record
- Must report monthly on overall database health and decay rate

BUSINESS OUTPUT

A continuously clean, accurate, and current lead database — no bounced emails, no wrong contacts

SUCCESS LOOKS LIKE

Email bounce rate below 3%.
Database data quality score above 90%.

AGENT 38 Inbound Signal Capture Agent

Identifies companies showing interest before they reach out

WHAT IT DOES

Detects when a company visits the website, engages with content, or interacts with the brand without making direct contact — and surfaces them as warm leads for immediate follow-up.

BUSINESS RULES

- Inbound signals must be correlated with the ICP before being added as leads
- Companies visiting pricing or case study pages must be flagged as high intent
- Signal must be acted upon within 24 hours while intent is fresh
- Must not contact someone based solely on a single page view — require 2+ signals
- Must link inbound signal to any existing lead record if the company is already in the pipeline
- Inbound leads must be tagged separately from outbound leads for attribution
- Must respect privacy laws — only use aggregated company-level data, not individual tracking

BUSINESS OUTPUT

A daily list of companies showing active interest in your business, ready for warm and timely outreach

SUCCESS LOOKS LIKE

Inbound signal leads convert to meetings at 2x the rate of cold outbound leads.

PHASE 7 · RETAIN & GROW

Protect every customer relationship and expand revenue over time

AGENT 39 Onboarding Handoff Agent

Ensures a seamless, informed transition from sale to delivery

WHAT IT DOES

At the moment a deal closes, immediately briefs the delivery or customer success team with complete context — what was promised, what the client expects, their key stakeholders, and agreed success criteria.

BUSINESS RULES

- Handoff brief must be delivered to the delivery team within 2 hours of deal close
- Must include everything promised during the sales process — no surprises for delivery
- Must specify the client's primary point of contact and communication preferences
- Must include the agreed success criteria from the qualification and POC stages
- Sales team must be available for a 30-minute handoff call within 48 hours of close
- Delivery team must confirm receipt and readiness before client onboarding begins
- Handoff quality must be tracked — delivery team rates every handoff

BUSINESS OUTPUT

A complete, actionable client brief in the hands of the delivery team the moment a deal closes

SUCCESS LOOKS LIKE

Client satisfaction in the first 30 days above 90%. Zero surprises for delivery team. Zero broken promises to clients.

AGENT 40 Lead Nurturing Agent

Keeps relationships warm with leads that are not ready to buy yet

WHAT IT DOES

Manages a long-term engagement programme for leads that said not now — sends relevant, valuable content, checks in at the right intervals, and re-activates the sales conversation when a buying signal appears.

BUSINESS RULES

- Nurture cadence: maximum one meaningful touch per month
- Every nurture touchpoint must provide genuine value — no hollow check-ins
- Must trigger immediate re-engagement when a buying signal is detected on a nurtured lead
- Nurture content must be

BUSINESS OUTPUT

A long-term pipeline of warm relationships that convert when the timing is right for the prospect

SUCCESS LOOKS LIKE

At least 15% of nurtured leads convert to active pipeline within 12 months.

- relevant to the lead's industry and pain points
- Must not use the same content twice with the same contact within 6 months
- Leads in nurture must be reviewed quarterly — are they still a valid ICP?
- Opt-out from nurture must be immediate and permanent

AGENT 41 Re-engagement Agent

Revives dormant leads and previously lost deals when conditions change

WHAT IT DOES

Monitors leads that went cold and triggers re-engagement when a relevant trigger occurs — new funding, leadership change, competitor failure, end of contract cycle, or seasonal buying period.

BUSINESS RULES

- Must have a specific trigger event to justify re-engagement — no random check-ins
- Re-engagement message must acknowledge the previous conversation
- Must lead with the trigger event as the reason for reaching out
- Must not re-engage a lead that explicitly asked to be removed
- Maximum 2 re-engagement attempts per trigger event
- If re-engaged lead goes cold again, move to 6-month pause before next attempt
- All re-engagement activity must be logged to measure re-engagement ROI

BUSINESS OUTPUT

Dormant opportunities re-activated at the right moment — pipeline recovered that would otherwise be permanently lost

SUCCESS LOOKS LIKE

Re-engagement programme contributes at least 10% of total pipeline. Trigger-based re-engagement converts at 2x cold outreach.

AGENT 42 Champion Tracker Agent

Follows your best contacts when they move to new companies

WHAT IT DOES

Monitors when contacts in your ICP network change jobs and alerts the team immediately. A satisfied contact at a new company is

BUSINESS RULES

- Must monitor all contacts who have previously engaged positively or been customers

BUSINESS OUTPUT

Instant, warm outreach triggered every time a friendly contact moves to a new company

an instant warm lead with built-in trust.

- Job change alert must fire within 48 hours of detection
- Re-engagement outreach must happen within 1 week of the job change
- Must reference the previous relationship naturally — not forcefully
- Must research the new company before reaching out — is it an ICP fit?
- Must not reach out if the contact moved to a competitor
- All champion move activity must be logged and tracked for ROI measurement

SUCCESS LOOKS LIKE

Champion move leads convert to meetings at 3x the rate of standard cold outreach.

AGENT 43 Expansion & Upsell Agent

Identifies and pursues growth opportunities within existing accounts

WHAT IT DOES

Analyses existing client accounts for expansion signals — growth in their business, new departments, new use cases, or new leadership — and surfaces the right conversation to grow the account.

BUSINESS RULES

- Expansion conversations must only begin after client is successfully onboarded
- Minimum 60-day post-close period before any upsell conversation
- Expansion must be positioned as a client benefit — not a revenue target
- Must always go through the existing Champion first — not direct to a new department
- Must have evidence of value delivered before requesting expansion
- Expansion pipeline must be tracked separately from new business pipeline
- Must never jeopardise the existing relationship by pushing expansion too aggressively

BUSINESS OUTPUT

A prioritised list of expansion opportunities per account with recommended approach and timing

SUCCESS LOOKS LIKE

Net Revenue Retention above 120%. Expansion revenue contributes at least 30% of total revenue.

AGENT 44 Referral Agent

Turns happy customers into a consistent source of warm new business

WHAT IT DOES

At the right point in the customer relationship, identifies specific referral opportunities and makes a targeted ask — requesting introduction to a specific named company or persona that fits the ICP.

BUSINESS RULES

- Referral ask must only happen after a clear success milestone is achieved
- Must ask for a specific referral — not a general 'anyone you know'
- Referral ask must be made to the Champion, not to procurement or finance
- Must make it easy — provide a suggested introduction message they can forward
- Must follow up on referral status within 2 weeks if no introduction received
- Must never make a customer feel obligated or pressured to refer
- Must send a thank-you and update on outcome of every referral — close the loop

BUSINESS OUTPUT

A steady stream of warm, referred leads from satisfied customers — the highest quality leads in the entire system

SUCCESS LOOKS LIKE

Referral programme active across all accounts over 6 months old. Referred leads close at 4x the rate of cold outbound.

AGENT 45 Revenue Intelligence Agent

Makes the entire GTM system smarter over time by learning from every deal

WHAT IT DOES

Analyses patterns across all won and lost deals to identify what is working and what is not — which messages, channels, sequences, personas, and market segments consistently outperform others — and feeds those learnings back into every other agent.

BUSINESS RULES

- Must analyse a minimum of 20 closed deals before generating pattern recommendations
- Win/loss reasons must be captured for every deal before analysis can begin
- Insights must be specific and actionable — not just descriptive
- Recommendations must feed back into ICP scoring, copywriting, and channel strategy
- Analysis must be refreshed monthly as more deal data accumulates
- Must separate insights by market segment — what works in one may not work in another

BUSINESS OUTPUT

A continuously improving GTM system that gets smarter with every deal — compounding results over time

SUCCESS LOOKS LIKE

Measurable improvement in key metrics (reply rate, meeting rate, close rate) in each successive quarter.

- | | | |
|--|--|--|
| | <ul style="list-style-type: none">– Human must review and approve intelligence recommendations before system-wide implementation | |
|--|--|--|

ENTERPRISE LAYER · ENTERPRISE CONTROL

Governance, compliance, and control for enterprise-grade operation at scale

AGENT 46 GTM Orchestrator

The central brain that coordinates all 51 other agents into one cohesive system

WHAT IT DOES

Sets daily priorities, decides which agents run in what order, manages human approval gates for sensitive actions, monitors overall system health, and ensures all agents are working toward the same goal.

BUSINESS RULES

- Must have a defined priority order for all agent actions — nothing runs ad-hoc
- Human approval gates must be set for: first contact with an account, proposal sending, contract signing
- Must surface a daily priority list every morning — top 10 actions across the entire system
- Any agent failure must be flagged within 15 minutes and a fallback must activate
- Must track overall system performance and report weekly
- Must enforce the compliance rules from the Compliance Agent across all other agents
- Must maintain a single consistent GTM strategy across all agents at all times

BUSINESS OUTPUT

A fully coordinated GTM operation running at maximum efficiency with humans in control of the decisions that matter

SUCCESS LOOKS LIKE

Zero conflicting actions across agents. System performance improving month over month. Human time focused only on high-value decisions.

AGENT 47 Multi-Tenant Management Agent

Manages multiple client workspaces completely independently and securely

WHAT IT DOES

Ensures each client of the agency operates in their own isolated environment — their ICP, leads, sequences, data, and billing are completely separate from every other client on the platform.

BUSINESS RULES

- Client data must never cross workspace boundaries under any circumstance
- Each client must have their own unique sending domains and accounts
- Client onboarding must follow a standardised setup checklist before going live

BUSINESS OUTPUT

Every client operates as if they have their own dedicated GTM system — fully isolated, fully independent

SUCCESS LOOKS LIKE

Zero cross-client data incidents. Client onboarding completed within 5 business days.

- Client access levels must be configured before access is granted
- Client offboarding must include complete data export and secure deletion
- Performance reporting must be separate per client — no cross-client benchmarking without consent
- Client tier must determine their feature access level — no tier spillover

AGENT 48 White-Label Delivery Agent

Delivers all outputs under the client's brand, not the agency's

WHAT IT DOES

Ensures every proposal, report, email signature, and client-facing communication is fully branded with the client's identity — their name, logo, colours, and tone of voice.

BUSINESS RULES

- No agency branding must appear on any client-facing output
- Client brand guidelines must be captured and stored before first deliverable
- All templates must be reviewed by the client and approved before use
- Brand updates must be applied across all templates within 48 hours of notification
- Must maintain a brand asset library per client
- Must flag any output where brand standards were not met before delivery
- Client must have the ability to preview any output before it is sent

BUSINESS OUTPUT

Every client-facing output looks and feels 100% on-brand — their customers never see the agency

SUCCESS LOOKS LIKE

Zero client complaints about brand inconsistency. All outputs pass brand review before delivery.

AGENT 49 Compliance & Governance Agent

Ensures all outreach and data handling meets legal requirements in every market

WHAT IT DOES

Manages opt-out requests, maintains do-not-contact lists, ensures outreach meets regional regulations (GDPR,

BUSINESS RULES

- Opt-out requests must be processed within 24 hours and applied across

BUSINESS OUTPUT

A fully compliant GTM operation with complete audit trail — zero regulatory risk for the agency or its

CAN-SPAM, CASL), keeps consent records, and maintains audit trails for all agent actions.

- all channels
- Do-not-contact list must be checked before every single outreach action
- Must maintain a record of the legal basis for contacting every prospect
- GDPR territories require explicit basis for contact — must be documented
- Data retention policies must be enforced — no data kept beyond defined period
- All agent actions must be audit-logged with timestamp, action, and outcome
- Compliance report must be generated monthly for review

clients

SUCCESS LOOKS LIKE

Zero compliance violations. All opt-outs processed within SLA. Audit trail 100% complete.

AGENT 50 SLA Monitoring Agent

Ensures every client commitment is met on time, every time

WHAT IT DOES

Monitors response times, delivery timelines, and service commitments across all client accounts. Identifies SLA risks before they become breaches and triggers escalation with enough time to act.

BUSINESS RULES

- Every client must have a documented SLA agreement on file before work begins
- SLA breach risk must be surfaced at least 4 hours before the deadline
- All SLA breaches must be logged and reviewed in the monthly performance report
- Repeated SLA breaches in the same area must trigger a process improvement review
- Client must be notified proactively of any potential delays — never after the fact
- SLA performance must be included in every client business review
- Escalation path must be clear and documented for every SLA type

BUSINESS OUTPUT

Real-time SLA health monitoring with proactive alerts — clients always experience a reliable, consistent service

SUCCESS LOOKS LIKE

SLA compliance rate above 95% across all clients. Zero unannounced SLA breaches.

AGENT 51 Inbound Content Agent*Attracts ideal customers through thought leadership and valuable content***WHAT IT DOES**

Creates and manages a content programme — LinkedIn posts, newsletters, case studies, and industry insights — that positions the brand as the authority in AI GTM and draws qualified inbound leads.

BUSINESS RULES

- All content must be relevant to the ICP's pain points — not self-promotional
- Content calendar must be planned at least 2 weeks in advance
- Every piece of content must have a clear purpose — awareness, credibility, or conversion
- Case studies require explicit client permission before publishing
- Content must be consistent with the overall GTM message and positioning
- Inbound leads generated by content must be tagged for attribution
- Content performance must be reviewed monthly — low-performing formats must be retired

BUSINESS OUTPUT

A steady stream of inbound leads attracted by relevant, high-value content — compounding over time

SUCCESS LOOKS LIKE

Inbound content contributes at least 20% of total pipeline within 6 months. Content engagement growing month over month.

AGENT 52 ABM Orchestration Agent*Runs deeply personalised, coordinated campaigns against high-value enterprise accounts***WHAT IT DOES**

Selects a focused list of named enterprise accounts and coordinates a sustained, multi-channel, multi-stakeholder campaign against each — aligning outreach, content, ads, and events around one account at a time until they engage.

BUSINESS RULES

- ABM list must be limited to accounts with deal values that justify the investment
- Each ABM account must have a dedicated account plan before campaign begins
- All stakeholders at the account must be identified before first contact
- All channels must be coordinated — no stakeholder receives a contradictory message
- ABM campaign must run for a minimum of 90 days before evaluating results

BUSINESS OUTPUT

A coordinated, sustained, account-level campaign running across all channels against every named enterprise target

SUCCESS LOOKS LIKE

ABM accounts convert to opportunities at 3x the rate of standard outreach. Average deal size from ABM 2x higher.

- | | | |
|--|--|--|
| | <ul style="list-style-type: none">– Must track account engagement score — combination of all touchpoints across all channels– ABM campaigns must be reviewed and personalised monthly as intelligence updates | |
